

LIKER IQ

FAT LIQUORS

CHEMICAL COMPOSITION

FATTY ACID CONDENSATION PRODUCT

CHARACTERISTICS

Apparance :	White liquid
pH in solution at 10 % :	4,0 – 5,0
Ionic Charge :	weakly cationic
Light fastness :	very good
Stability :	very good to acids, electrolytes and hardwater, limited stability with alkalis
Compatibility :	good with cationic, amphoteric and nonionic products. Limited compatibility with anionic products – precipitation May occur.

PROPERTIES

LIKER IQ is used in the main tannage for a more rapid and uniform penetration of the chrome and to provide a background fatliquoring effect. Also recommended as a top fatliquor to improve handle, feel and lustre on sues and retanned leathers.
