

MAC R

WET AUXILIARY
CHEMICAL COMPOSITION
BATING AGENT

CHARACTERISTICS

Apparance :	light powder
pH in solution at 10 % :	7-8 (10% solution)
enzymatic units :	L.V. 850

PROPERTIES

MAC R is a classic bating agent for precious skins like calves and kids where it cleans the grain well, making it fine and elastic.

MAC R, if used in low percentages, is used in the working of skins which must retain a certain consistency, but if used in higher dosage it is employed with soft skins like tssel and softy.

Anyway, the **MAC R** action is powerful, and the working times have to be followed carefully and they must never be too long.

APPLICATION

Listed below there are the advised quantities for some among the most common types of skins:

Calves for upper : it is used from 0,4% to 0,8%

Cow skins for upper : it is used from 0,4% to 0,8%
